

Observing Questions

Instructions

Imagine that you are standing in front of Allah on the Day of Judgement. That is how we know the level of importance of anything. Read through the following list of questions entirely. You will then do two things:

I – Discuss and group the questions into three levels of importance: (1) High (2) Medium and (3) Low.

II – Once you have done the above, **put the questions in each group into a list** based on highest to lowest priority, where the question on the top is the most important, and the questions become less important as you go down the list. (Keep in mind that just because a question is near the bottom of the list, does not mean it is *not* important. It just means that the question above it is *more* important).

Why is this animal striped?

How do I get into Jannah?

What unseen things does Allah want me to know about/believe in?

Does applying oil to the skin break my fast?

Why do these two chemicals react the way they do?

How do stars shine?
